

On Friday 7th of March Einstein Class planted their beans.

The children carefully watered them every few days and kept them by a window.

**Once it was warm enough we carefully planted our beans in the garden.
With the sunshine and carefully watering them they grew and grew!**

As the weeks past the plants began to flower and then the beans grew from the flowers.

**On Friday 18th of July the children in Einstein Class
harvested their first crop of runner beans!**
